

### REMARKS/ARGUMENTS

As stated above, Applicant elects Species 2, shown in FIG. 2, with claims 10-15 readable thereon, for further prosecution, and claims 1-3 being generic and respectfully traverses the requirement for restriction for the following reasons:

It is believed that any search for the invention embodied in FIG. 2 would necessarily include a search for the species embodied in FIG. 1. Thus, a simultaneous search for both species is believed not to constitute an unreasonable search for the Patent Examiner.

In addition, it is believed that the objectives of streamlined examination and compact prosecution would be promoted if a search were conducted simultaneously for both species. Also, the necessity of filing multiple patent applications in this case does not serve to promote the public interest because of the extra expense that is involved, in filing fees and examination costs, as well as the burden upon the public, due to the necessity of searching through a multiplicity of patent files in order to find the complete range of the subject matter claimed

in several different patents that could otherwise be found in one issued patent only.

Applicant reserves the right to file a divisional application for the non-elected species.

For all these reasons, it is respectfully requested that the restriction requirement under 35 U.S.C. 121 be withdrawn and that an action on the merits of all the claims be rendered.

Respectfully submitted,  
Helmut STRAUCH
